

# Unifor Local 673 President Report

April 30, 2025

## Delegate to ETOP

**Unifor Education Technical Office Professional (ETOP) Council** took place April 23 and 24 at the union's National office in Toronto, with its biggest turnout yet. The conference was truly outstanding, and the effort that went into bringing it all together was nothing short of remarkable. Emily Heikoop ETOP chairperson and the executive team, Jodi Corby, Simar Walia, Mike Kisch, and Martin Melanson, went above and beyond, delivering an impressive two-day lineup of speakers who both engaged and educated the audience. This was truly one of the best councils Unifor has to offer. From bystander intervention training to managing documents with AI, from in-depth discussions on tariffs and the transition of workers, to addressing workplace tech violence and organizing strategies, ETOP covered it all. The addition of a strong focus on cybersecurity was also timely and essential. An incredible and inspiring event!

I move to adopt my report.
